indicator and audible alarm

Standard currencies:
EUR-USD-GBP-CHF-CZK-PLN-HUF-
RON-BGN-RUB

Introduction

The CCE 30 is a versatile electronic counterfeit detector that uses advanced sensor technology to reliably verify the authenticity of banknotes. Particularly noteworthy is its ability to process up to ten different currencies, including EUR, USD and GBP as standard. Thanks to the integrated sensors, the device recognizes these three main currencies without manual switching, which considerably simplifies the verification process.

For companies that work with other currencies, the CCE 30 offers the option of installing various currency packages.

The CCE 30 has passed the counterfeit money test of the European Central Bank (ECB) by 100%, which emphasizes its high reliability. Another advantage of the CCE 30 is its easy maintenance. The hinged design makes it easy to access and clean the sensors, which supports the longevity and accuracy of the device. In addition, an optional battery pack is available, which makes the tester flexible and mobile. Overall, the CCE 30 offers an effective counterfeit detection solution for companies that work with multiple currencies, ensuring secure and efficient payment transactions.

Product Group

Counterfeit Detector

Electronic Detectors

Characteristics

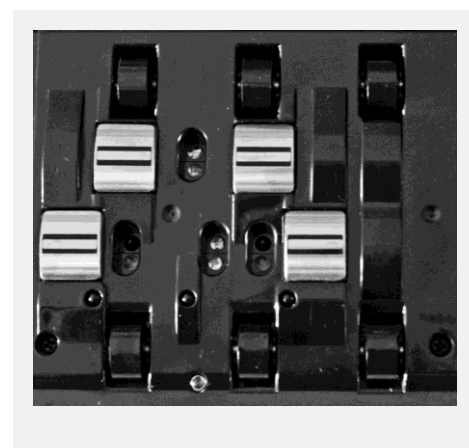

Level of counterfeit detection	ECB approved
EUR processing	✓
US Dollar processing	✓
Type of display	LCD Display
Mobile use possible	✓ optional battery
Standard software	EUR-USD-GBP-CHF-CZK-PLN HUF-RON-BGN-RUB
Other currencies available	✓
Functions	Individual and total value display, four-sided Euro slot, output of genuine banknotes at the front / back selectable, can be opened for cleaning

Technical features

Dimensions	157 x 137 x 83 mm
Weight	0,54 kg
Power consumption	approx. 10 W
Power connection	AC 100-240V / 50-60Hz DC 12V/1A
Certification	CE, RoHS

Optional accessories

Lithium-ion battery
12V car charging cable
